INSTRUCTIONS TO USE

Deposit the required amount of chocolate in a melting device, heat the chocolate to a homogeneous temperature between $40^{\circ}\text{C} - 45^{\circ}\text{C}$ to completely melt the crystalline structure. To temper this chocolate, follow the temperature curve below, making sure the entirety of the chocolate reaches these temperatures in each step: $40\text{-}45^{\circ}\text{C}$ ($104\text{-}113^{\circ}\text{F}$); 27°C (80.6°F); 31.5°C (88.7°F). After tempering, place the chocolate in your favorite molds and cool to $14\text{-}16^{\circ}\text{C}$ at < 50% RH until fully solidified.

Temper Curve

STORAGE CONDITIONS

Store in a clean, dry and odorless environment, ideal storage temperatures are 18-22 °C and < 50% relative humidity. The product should be placed in an area that allows proper air circulation and should not be exposed to direct sunlight.

TRANSPORT METHOD

Transport in a clean and dry refrigerated container exclusively for food, free of leaks, strange odors, grease stains or excessive humidity, without exposing the product to direct sunlight.

RECORDS

The manufacturing conditions of this product comply with the legislation of the Costa Rican government and is allowed by means of an Operating Permit from the Food Control Directorate of the Ministry of Health of Costa Rica.
